

MARTIN WIMBERLEY
PROJECT COORDINATOR

830-357-7986 | MWimberley@Timberlyne.com

Martin is one of Timberlyne's experienced Project Coordinators, ready to help guide you through the exciting process of building a home, barn, or commercial structure.

Passionate about architecture and timber design, Martin guides customers to solutions satisfying their budget and aspirations.

Martin works on projects from coast to coast. He resides in Boerne, Texas, but studied Architecture in Georgia and worked at Architecture Firms in Rhode Island before working at Timberlyne. He has vast knowledge working with customers on fully custom homes, multi-structure retreats and ranches, custom horse barns, and commercial buildings for businesses and venues.

A standout project at Timberlyne for Martin was Pecan Spring Ranch. The client was a lobbyist/rancher looking to build a conference center and retreat on his 300+ acre property. The historic home on the property had been struck by lightning years ago and burnt to the ground, leaving only some stone ruins. My family and I stayed on the property for a few days, getting to know the history, site, & client aspirations. I designed a structure that paid homage to his family's history, their original home, and the ranch's future.

Martin and his wife, Kristel (*who also has a Master's Degree in Architecture*), have three sons, Max, Tom, and Sam. Martin enjoys spending his free time with his family, whether at church, camping, hiking, sports, or on road trips. He has been to almost every national park in the country.

“ I'm passionate about architecture & timber design. Guiding customers to solutions that satisfy both their budget & aspirations is the most fulfilling part of my job! ”
